

# Instructions Page

- 1 Fold main panel down the middle.
- 2 Glue with lots of glue stick – make sure all strips are covered.
- 3 Cut out each of the 3 patterns.
- 4 Follow all the steps below. Then keep repeating steps 5–6 – folding the outside strips over to each side to create a plait.

When you get to the end of the plait, glue the last bits at the end to keep them from unraveling. Then trim any bits of paper at the ends.

[Optional: Carefully make a hole in one of the ends and tie a tassel to it!]
